Observations *(of the end of tool,
use additional space if required)*

The Company is presently in operation. Hurricane Ivan had caused a lack of electricity supply for about one month (September -October 2005). The employment of the main company's personnel who was trained on the project and who was developing the documentation for the company has had to be terminated. The Company has to date not received the draft procedure manual that was being prepared by him as was promised. In addition, the computer with some files had crashed and these files have not been retrieved to date. So no documentation in this regard was observed on the date of the evaluation.

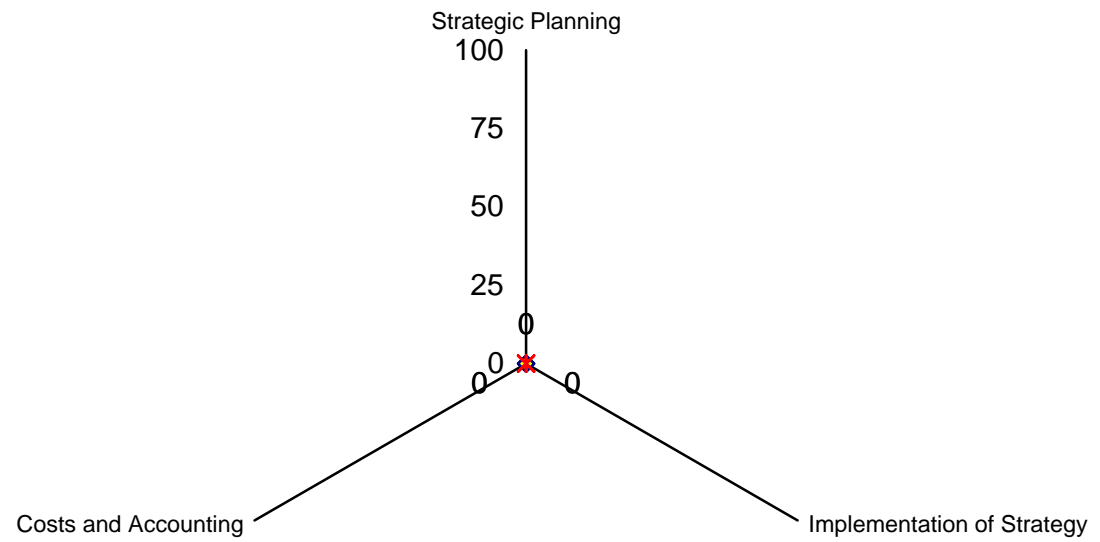

The owner of the company feels that the main impact of the project on the company has been on its sales, bottom line and efficiency as these have improved as a result of recycling of some of the waste materials (coconut shell as fuel). Product losses have been reduced significantly, from 3% to 1%, which is mainly due to the training of personnel and applying some of the principles of GMP.
